

One Revolution Tube Cutter (ORTC)

Pierce Heat Exchanger Tubes Prior to Plugging

Ideal for piercing tubes prior to installing Pop-A-Plug Tube Plugs. Capable of cutting ferrous & non-ferrous tubes commonly found in heat exchangers, boilers & condensers. Adjustable depth for tube sheets from 1" - 6" (25.4mm to 152.4mm) thick. No special drives required, simple operation with ratchet or hand wrench. *(not for use with impact wrenches).*

Available Sizes

- 0.5" to 2" (12.7 mm to 50.8 mm)
additional sizes available upon request

Standard Material

- Hardened Steel

Cutting bit detail - open/closed positions
